Dear Sir,

It is about time that you allow Bill Gates to do what he does best and that is to use the American System of Free Enterprise.

Bill Gates did not do anything wrong. 1) He came up with a product that is superior to anything else on the market; 2) Most of the intelligent manufacturers decided to use his products; and 3) people became adept at using his products and, regardless of what they say, are desirous of maintaining compatibility in their systems and continue to purchase Microsoft software.

Bill gates did it the correct way. It is about time that the U.S. Government gets off of his back and allows him to continue to provide the American public with the products (software) that the want.

How about the Justice Department really going after the "BAD GUYS" in our society and letting Bill Gates and Microsoft alone.

Thank you very much,

William J. Staskel
